VOTINGRECORD 2009 TEXAS

YOUR LEGISLATORS' VOTING RECORD ON SMALL BUSINESS ISSUES

2009 SESSION: Floor votes by your state legislators on key small business issues are listed inside. The Voting Record does not reflect all elements considered by a lawmaker when voting, nor does it represent a complete profile of a legislator, but it can be a guide in evaluating a legislator's attitude toward small business. Many issues affecting small business are decided in committees and never make it to the floor of the House or Senate. Please thank those legislators who supported small business and continue to work with those who have fallen short.

HOUSE

1 HB 394: This bill was designed to allow some flexibility for expenditures from the Texas Enterprise Fund to benefit certain small businesses. It encourages the development and location of small businesses in Texas and promotes opportunities for those businesses to prosper through grants from this fund. **A "Yes" vote supported the NFIB position.** HB 394 passed both houses of the Legislature unanimously and was signed into law by the governor. It became effective in June 2009.

2 HB 4765: This bill exempts businesses with gross receipts less than or equal to $1 million from paying the state franchise tax. This exemption expires in 2011, at which time the exemption ceiling drops to $600,000 in gross receipts. **A "Yes" vote supported the NFIB position.** This legislation was an NFIB key reform to the state's new franchise tax. HB 4765 passed both houses of the Legislature and was signed into law by the governor.

3 HB 1657: This legislation would have weakened the state's workers' compensation system and reversed state law, according to legal experts. Simply put, this measure would reverse a 2008 Texas Supreme Court decision (*Entergy v. Summers*) and ensure that a premises owner cannot also be a general contractor. In this case, the court held that parties who buy workers' compensation insurance should get the benefit of the policy. **A "No" vote supported the NFIB position.** The bill passed the House but died in the Senate.

4 HB 1914: This legislation abolishes the Private Sector Prison Industries Oversight Authority and reforms the operation of private sector prison industries programs. The bill protects businesses that do not participate in the programs from unfair competitive advantages that could result from the employment of inmate labor. **A "Yes" vote supported the NFIB position.** HB 1914 passed both houses of the Legislature and was signed into law by the governor.

5 HB 1096: This legislation prescribes procedures by which each institution of higher education is required to provide to each student enrolled at the institution written notice regarding the availability of required or recommended textbooks at retailers other than university-affiliated bookstores. The measure would give smaller independent bookstores the ability to compete against the larger retail outlets. **A "Yes" vote supported the NFIB position.** HB 1096 passed both houses of the Legislature and was signed into law by the governor.

6 HB 464: This bill requires a dynamic fiscal note to be prepared in addition to the normal fiscal note if a bill will have a significant fiscal impact. NFIB supports legislation which will limit the growth of government and keep spending in check. Specifically, NFIB favors legislation that would limit future annual increases in state spending to the increase in the rate of inflation plus state population growth. **A "Yes" vote supported the NFIB position.** HB 464 passed both houses of the Legislature and was signed into law by the governor.

7 HB 1290: This bill mandates that health benefit plans cover bariatric surgery and certain tests for the early detection of cardiovascular disease. NFIB believes that new health insurance mandates only serve to pass costs on to consumers and business owners in the form of increased premiums. NFIB supports a moratorium on all new health insurance mandates and supports an examination of the system in an effort to roll back current mandates. **A "No" vote supported the NFIB position.** HB 1290 passed both houses of the Legislature and was signed into law by the governor.

VOTING KEY

Y	=	Vote in support of proposed legislation
N	=	Vote in opposition of proposed legislation
A	=	Absent
E	=	Excused Absence
PNV	=	Present Not Voting

• Scores are calculated based on total votes cast.

Numbers following legislators' names correspond with the districts they represent.

8 HB 2000: This bill mandates that health benefit plans provide coverage for amino acid-based elemental formulas regardless of the formula delivery method. NFIB believes that new health insurance mandates only serve to pass costs on to consumers and business owners in the form of increased premiums. NFIB supports a moratorium on all new health insurance mandates and supports an examination of the system in an effort to roll back current mandates. **A "No" vote supported the NFIB position.** HB 2000 passed both houses of the Legislature and was signed into law by the governor.

SENATE

1 HB 394: This bill was designed to allow some flexibility for expenditures from the Texas Enterprise Fund to benefit certain small businesses. It encourages the development and location of small businesses in Texas and promotes opportunities for those businesses to prosper through grants from this fund. **A "Yes" vote supported the NFIB position.** HB 394 passed both houses of the Legislature unanimously and was signed into law by the governor. It became effective in June 2009.

2 SJR 52: This resolution proposed a constitutional amendment authorizing the Legislature to permit counties to assess and collect a motor fuels tax and an additional vehicle registration fee to be used for mobility improvement projects. In a member ballot, NFIB members overwhelmingly rejected an increase in the state's motor fuels taxes. **A "No" vote supported NFIB position.** The resolution passed the Senate but died in the House.

3 HB 4765: This bill exempts businesses with gross receipts less than or equal to $1 million from paying the state franchise tax. This exemption expires in 2011, at which time the exemption ceiling drops to $600,000 in gross receipts. **A "Yes" vote supported the NFIB position.** This legislation was an NFIB key reform to the state's new franchise tax. HB 4765 passed both houses of the Legislature and was signed into law by the governor.

4 SB 1569: This bill, known as "unemployment insurance modernization," would have provided $555 million in stimulus dollars from the Federal Unemployment Account to expand unemployment insurance benefits to the state's displaced workers. This legislation would have increased unemployment taxes by up to $80 million per year on business owners. **A "No" vote supported the NFIB position.** The bill passed the Senate, but died in the House.

5 SB 1123: This bill would have reversed two recent court cases concerning asbestos litigation by weakening current standards and opening the doors to further litigation in our courts. The standards set by the court for asbestos and mesothelioma cases allow defendants with no real role in causing injury to exit litigation at an early stage in the process. **A "No" vote supported the NFIB position.** SB 1123 passed the Senate, but died in the House.

6 HB 1914: This legislation abolishes the Private Sector Prison Industries Oversight Authority and reforms the operation of private sector prison industries programs. The bill protects businesses that do not participate in the programs from unfair competitive advantages that could result from the employment of inmate labor. **A "Yes" vote supported the NFIB position.** HB 1914 passed both houses of the Legislature and was signed into law by the governor.

7 HB 464: This bill requires a dynamic fiscal note to be prepared in addition to the normal fiscal note if a bill will have a significant fiscal impact. NFIB supports legislation which will limit the growth of government and keep spending in check. Specifically, NFIB favors legislation that would limit future annual increases in state spending to the increase in the rate of inflation plus state population growth. **A "Yes" vote supported the NFIB position.** HB 464 passed both houses of the Legislature and was signed into law by the governor.

8 HB 1290: This bill mandates that health benefit plans cover bariatric surgery and certain tests for the early detection of cardiovascular disease. NFIB believes that new health insurance mandates only serve to pass costs on to consumers and business owners in the form of increased premiums. NFIB supports a moratorium on all new health insurance mandates and supports an examination of the system in an effort to roll back current mandates. **A "No" vote supported the NFIB position.** HB 1290 passed both houses of the Legislature and was signed into law by the governor.

9 HB 2000: This bill mandates that health benefit plans provide coverage for amino acid-based elemental formulas regardless of the formula delivery method. NFIB believes that new health insurance mandates only serve to pass costs on to consumers and business owners in the form of increased premiums. NFIB supports a moratorium on all new health insurance mandates and supports an examination of the system in an effort to roll back current mandates. **A "No" vote supported the NFIB position.** HB 2000 passed both houses of the Legislature and was signed into law by the governor.

10 SB 859: This bill is designed to improve the integrity of the Texas Unemployment Insurance program and the solvency of our UI Trust Fund. It amends state law to make it harder to qualify for benefits when a claimant's last employment was for a short duration for a temporary job with an employer who does not pay UI taxes. This bill addresses the anomaly in current law that tends to circumvent the intent of the workforce attachment provisions of the unemployment insurance program by clarifying the terms "last work" and "person for whom the claimant last worked." **A "Yes" vote supported the NFIB position.** The bill passed the Senate but died in the House.
