(Column 1 is the current reading; column 2 is the change from the prior month; column 3 the percent of the total change accounted for by each component; * is under 1 percent and not a meaningful calculation)

ECONOMIC TRENDS

NFIB Research Foundation has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Foundation. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Foundation. © NFIB Research Foundation. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Senior Policy Analyst Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Small Business Optimism Index increased by 0.2 points to 94.1. Only three of the Index components improved, two were unchanged, and five were lower indicating that the small business half of the economy was still adding little to growth beyond that needed to support population growth.. Technically, January marks the third monthly increases in a row, but unfortunately, each monthly increase is lower than the last. But while improvements are losing steam, the increase still beats a decline.

LABOR MARKETS

NFIB owners increased employment by an average of 0.12 workers per firm in January (seasonally adjusted), half the December reading, but a solid number. While these numbers look historically good, the problem is that there are many fewer firms. Seasonally adjusted, 13 percent of the owners (down 1 point) reported adding an average of 3.7 workers per firm over the past few months. Offsetting that, 11 percent reduced employment (up 1 point) an average of 3.3 workers, producing the seasonally adjusted net gain of 0.12 workers per firm overall. Forty-six percent of the owners hired or tried to hire in the last three months and 38 percent (83 percent of those trying to hire or hiring) reported few or no qualified applicants for open positions. Job creation plans surprised on the upside, rising 4 points to a net 12 percent. This is the best reading since September 2007. Twenty-two percent of all owners reported job openings they could not fill in the current period (down 1 point). This suggests that the unemployment rate did not change much in January. Fourteen percent reported using temporary workers, unchanged from December.

CAPITAL SPENDING

Fifty-nine (59) percent reported outlays, down 5 points but an improving number historically as December numbers were boosted by the expiration of generous expensing rules. The “declines” simply reflect the impact of government rule changes, and not a weakening of fundamental spending. These “temporary” breaks don’t change the amount of spending long term, just move it around in time. The percent of owners planning capital outlays in the next 3 to 6 months fell 2 points to 24 percent. Eight percent characterized the current period as a good time to expand facilities (down 2 points). Of those who said it was a bad time to expand (59 percent), 27 percent still blamed the political environment, suggesting that at least for these owners, Washington is preventing their spending on expansion.

This survey was conducted in January 2014. A sample of 10,799 small-business owners/members was drawn. One thousand eight hundred and sixty-four (1,864) usable responses were received – a response rate of 17 percent.

SUMMARY

INVENTORIES AND SALES

The net percent of all owners (seasonally adjusted) reporting higher nominal sales in the past three months compared to the prior three months deteriorated 2 points to a net negative 10 percent. Fourteen (14) percent still cite weak sales as their top business problem, but this is the lowest since June 2008. The monthly peak was 34 percent, set in early 2010. The net percent of owners expecting higher real sales volumes rose a huge 7 points to 15 percent of all owners on top of a 5 point gain in December. This puts this indicator into “normal” territory for a growing economy – hope they are right!

The pace of inventory reduction continued, with a net negative 4 percent of all owners reporting growth in inventories (seasonally adjusted). The assessment of the adequacy of current inventory stocks improved a bit but remained negative after a streak of favorable views. The net percent of owners viewing current stocks as “too low” improved 3 points to a net negative 2 percent. The net percent of owners planning to add to inventory stocks was a net negative 3 percent (down 1 point), indicating little appetite to add to stocks already viewed as excessive relative to sales expectations.

INFLATION

Seasonally adjusted, the net percent of owners raising selling prices was a net 2 percent, up 3 points. Twenty-five (25) percent plan on raising average prices in the next few months (unchanged), and 3 percent plan reductions (unchanged). Clearly, reality is preventing firms from implementing the price hikes they would like to have. Seasonally adjusted, a net 19 percent plan price hikes (unchanged), a long way from the net 2 percent reporting higher actual prices.

PROFITS AND WAGES

Earnings trends worsened 5 points in January, falling to a net negative 27 percent (net percent reporting quarter to quarter earnings trending higher or lower). Three percent reported reduced worker compensation and 20 percent reported raising compensation, yielding seasonally adjusted net 19 percent reporting higher worker compensation (unchanged), the best readings since 2008. A net seasonally adjusted net 11 percent plan to raise compensation in the coming months, down 2 points from December.

CREDIT MARKETS

Five percent of the owners reported that all their credit needs were not met, 1 point above the record low. Thirty-one (31) percent reported all credit needs met, and 52 percent explicitly said they did not want a loan. Only 2 percent reported that financing was their top business problem compared to 24 percent citing taxes, 22 percent citing regulations and red tape and 14 percent citing weak sales. Thirty-one percent of all owners reported borrowing on a regular basis, up 1 point but only 3 points above the record low. A net 6 percent reported loans “harder to get” compared to their last attempt, 1 point improvement from December. The average rate paid on short maturity loans was steady at 5.6 percent.

COMMENTARY

Last year finished with a fair uptick in economic activity, but probably not as strong as the “headline” GDP numbers made it look. Overall, GDP was up only 1.9 percent in 2013, down from 2.8 percent in 2012. But the second half of the year posted above trend growth numbers, a rare showing in our 5 year recovery. Exports were strong, that’s good for manufacturing output, but less so for jobs – productivity looking good. A huge share of the growth was in inventory building, nice while it is happening, but usually followed by sub-normal production later as excess stocks are worked off. That will depress activity in the first half of 2014 and keep some prices down.

Employment starts 2014 over a million below its peak in January 2008 and prospects for a major recovery in jobs are not good. Missing from the jobs numbers and GDP are construction workers. While housing starts have been improving, it has been at a very slow pace, leaving starts a half a million below what was thought to be trend, though some starts are “bigger” than others, multifamily starts absorb a lot of households per start. NFIB labor market indicators have recently seen a return to normal but not expansion levels, encouraging in that reversals are now less likely. The average increase in workers per firm has risen in recent quarters, indicating new job creation. However, there are far fewer firms hiring workers than there were in 2007 and many of those still in existence have downsized.

Tapering has started, but the impact on owners’ views about loan markets has not been impacted, nor was it when QE was started. Low rates are nice, but one must repay a loan which means the loan proceeds must be productively deployed and opportunities to do so in this recovery have been scarce for small businesses. Nearly two-thirds of owners continue to express no interest in a loan and historically low percentages complain about lack of access. QE didn’t have much of an impact on jobs and tapering probably will not either, it’s a “big bank” event, trading the yield curve, not making business loans.

As noted last time, economic policy will be dominated by vote getting, not sensible strategies to improve economic growth and job creation, to wit, with a 20 percent teen unemployment rate, liberal policy makers want to raise the minimum wage. This will, barring a surge in economic activity that raises the values of these workers, undoubtedly worsen unemployment and job opportunities in the future.

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or “income” (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Are...loans easier or harder to get than they were three months ago? 12

During the last three months, was your firm able to satisfy its borrowing needs? 13

Do you expect to find it easier or harder to obtain your required financing during the next three months? 13

If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago? 14

If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay? 14

During the last three months, did you increase or decrease your inventories? 15

At the present time, do you feel your inventories are too large, about right, or inadequate? 15

Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them? 15

During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land? 16

If [your firm made any capital expenditures], what was the total cost of all these projects? 17

Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment? 17

What is the single most important problem facing your business today? 18

Please classify your major business activity, using one of the categories of example below 19

How many employees do you have full and part-time, including yourself? 19
