ECONOMIC TRENDS

NFIB Research Foundation has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Foundation. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Foundation. © NFIB Research Foundation. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Director of Research and Policy Analysis Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Index of Small Business Optimism increased 1.4 points to 98.3 in spite of 5 months of lousy growth. May is the best reading since the 100.4 December reading but nothing to write home about. The 42 year average is 98.0, a bit lower than the 99.5 average through 2007. Eight of the 10 Index components posted improvements. Overall, the Index remained in a holding pattern, a few points below the pre-recession average, although at the 42 year average, and showing no tendency to “break out” into a stronger pattern of economic growth.

LABOR MARKETS

Small businesses posted another decent month of job creation in May, a string of 5 solid months of job creation. On balance, owners added a net 0.13 workers per firm over the past few months. Fourteen percent reported raising employment an average of 2.7 workers per firm while 12 percent reported reducing employment an average of 3 workers per firm. Fifty-five percent reported hiring or trying to hire (up 2 points), but 47 percent, reported few or no qualified applicants for the positions they were trying to fill. Thirteen percent reported using temporary workers. Twenty-nine percent of all owners reported job openings they could not fill in the current period, up 2 points, revisiting the February reading, and the highest reading since April 2006.

INVENTORIES AND SALES

The seasonally adjusted net percent of all owners reporting higher nominal sales in the past 3 months compared to the prior 3 months rose a stunning 11 points to a net 7 percent. Eleven percent cited weak sales as their top business problem (unchanged). Expected real sales volumes posted a 3 point decline, falling to a net 7 percent of owners expecting gains, after a 5 point decline in January and February, a 2 point decline in March and a 3 point decline in April. Overall, expectations are not showing a lot of strength.

The net percent of owners reporting inventory increases fell 4 points to a net negative 5 percent (seasonally adjusted). The net percent of owners viewing current inventory stocks as “too low” improved 1 point to a net 0 percent. The reductions were apparently a result of unexpectedly strong improvement in sales trends, and this left balance in the assessment of current stocks. The net percent of owners planning to add to inventory was unchanged at a net 4 percent, in sympathy with the more widespread reduction in stocks. Inventory investment might have been even stronger in light of the liquidation had expectations for real sales gains improved rather than softened.

CAPITAL SPENDING

Fifty-four percent reported outlays, down a surprising 6 points. Of those making expenditures, 39 percent reported spending on new equipment (up 4 points), 21 percent acquired vehicles (down 4 points), and 13 percent improved or expanded facilities (unchanged). Six percent acquired new buildings or land for expansion and 12 percent spent money for new fixtures and furniture, both figures up 1 point. These numbers suggest, overall, a back-tracking of investment spending. The percent of owners planning capital outlays in the next 3 to 6 months fell 1 point to 25 percent, not a strong reading historically but among the best in this expansion.

INFLATION

Seasonally adjusted, the net percent of owners raising selling prices was 6 percent, up 4 points but still a “tame” reading. However, if the strength in sales gains persists, owners will have more opportunities to raise prices. Seasonally adjusted, a net 17 percent plan price hikes (unchanged). The economy has grown too slowly to support widespread price hikes.

EARNINGS AND WAGES

Earnings trends posted an unexpected 9 point gain, posting a reading of a net negative 7 percent reporting higher earnings, this on top of a 6 point improvement in April. This is the best reading since October 2005. The main factor improving the earnings trend was the decline in the percent reporting lower earnings quarter on quarter.

Reports of increased labor compensation rose a point to a net 25 percent of all owners. Reports of gains this frequent occurred in December 2014 and January of this year, but those are the highest readings since January 2008 when employment last peaked before the recession. Labor costs continue to put pressure on the bottom line, but fuel prices are down a lot and sales trends much stronger. This should begin to show up in wage growth, although rising benefits offset potential increases in take-home pay. A seasonally adjusted net 14 percent plan to raise compensation in the coming months (unchanged). The reported gains in compensation are still in the range typical of an economy with reasonable growth.

CREDIT MARKETS

Four percent of owners reported that all their borrowing needs were not satisfied, unchanged and historically low. Thirty percent reported all credit needs met, and 50 percent explicitly said they did not want a loan. For most of the recession, record numbers of firms have been on the “credit sidelines”, seeing no good reason to borrow. Only 2 percent reported that financing was their top business problem (unchanged). In the Great Recession, no more than 5 percent cited credit availability and interest rates as their top problem (chart) compared to as high as 37 percent in the Volcker era. If credit availability is really a problem, owners let it be known. Twenty-nine percent of all owners reported borrowing on a regular basis, down 1 point.

COMMENTARY

Real GDP declined in Q1 following a not very impressive 2014Q4. Special events (weather, dock strike, oil patch weakness) certainly subtracted a point or so from growth, but the fundamental economy did not have enough strength to survive the shocks and that remains the problem. The second quarter did not get off to a good start, growth of course will look better because the denominator is lower in Q1. It looks like trade will be a positive for Q2 as the deficit fell - that will help. Financial markets are driven by “Fed guessing”. In spite of the poor first quarter performance, growth for the 12 months through March 31 was approaching 3 percent, very inconsistent with current Federal Reserve policy, as are current labor market indicators. The Fed’s reticence to move, the continual delays, are negatives for growth, generating considerable uncertainty. A move toward “normalization” would be welcome to the real economy and to savers. The Fed should give up managing asset prices.

The NFIB May survey results confirm that the economy is moving ahead, but at an uninspiring pace. Owners do what is necessary, hire workers when needed, to keep up with growth mostly powered by population growth. Growth is not inspired, owners remain generally pessimistic about a pickup in the economy of any consequence. None of its top issues will be address over the next few years, the Administration is focused on global warming polices that with certainty will depress growth in the near-term for sure.

Owners report that the labor market is, from an historical perspective, getting very tight. Owner complaints about “finding qualified workers” are rising, job openings are near 42 year record high levels, and job creation plans remain solid. Over 80 percent of those hiring or trying to hire in May reported few nor no qualified applicants. This is inconsistent with current Fed policy, which has no impact on the supply of qualified workers.

In spite of the poor first quarter performance, there is no recession in the cards, absent a huge unpredictable negative shock. Reports of positive sales and profit trends auger well for the second half, credit is not a problem and rates are still low (although everyone already has their low rate loan). Capital spending has still not picked up any strength, a firmer record of spending growth will be required (not lower interest rates). But “replacement” demand continues and the need for it grows with time and technological advance.

NFIB data do not look forward much beyond the third quarter, and that appears to be “more of the same”, maybe a slightly faster pace of “plodding”.

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or “income” (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Are...loans easier or harder to get than they were three months ago? 12

During the last three months, was your firm able to satisfy its borrowing needs? 13

Do you expect to find it easier or harder to obtain your required financing during the next three months? 13

If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago? 14

If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay? 14

During the last three months, did you increase or decrease your inventories? 15

At the present time, do you feel your inventories are too large, about right, or inadequate? 15

Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them? 15

During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land? 16

If [your firm made any capital expenditures], what was the total cost of all these projects? 17

Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment? 17

What is the single most important problem facing your business today? 18

Please classify your major business activity, using one of the categories of example below 19

How many employees do you have full and part-time, including yourself? 19
